DSL & Comcast Voice Customers!!

DSL requires a specific filter in order to work with any alarm system. Please contact our office so we can mail you one.

Comcast Voice customers will need to have Omega come out and connect our phone interface to your new system. Keep this in mind when pricing out Comcast for a phone line.

5 questions you should ask yourself every quarter:

- Is my phone list up to date?
- Has Omega been out to inspect my equipment in the past three years?
- Are my smoke detectors in proper working order?
- Are there new products available that could make my home or business safer?
- Who could I refer to receive three months of FREE monitoring?

OMEGA SECURITY SYSTEMS, INC.
P.O. Box 280
Southampton, PA 18966

Spring 09' Newsletter

Are your phone lines protected?

No matter how many locks, sensors or detectors you have, your entire system depends on one fine line between safety and danger - your phone line.

Until recently, the cutting of phone lines was not commonly reported in the news. However, with the media reporting more details than ever on how crimes are actually committed, the need for more protection is greater than ever.

Omega can provide a secure, **cellular** link that transmits alarm messages to your monitoring station, even when phone lines are down. Call Omega today to receive a quote on this product and the peace of mind it can provide you.

Want to save money and protect others?

Give Omega Security a successful referral and we will give you **3 months of FREE monitoring.**

Friends, family & co-workers are all great referrals for Omega

Daylight Savings Time

How do I change the clock on my keypad?

- enter [*] [6]
- your 4 digit **Master Code.**
