

**DSL & Comcast
Voice Customers!!**

DSL requires a specific filter in order to work with any alarm system. Please contact our office so we can mail you one.

Comcast Voice customers will need to have Omega come out and connect our phone interface to your new system. Keep this in mind when pricing out Comcast for a phone line.

5 questions you should ask yourself every quarter:

- Is my phone list up to date?
- Has Omega been out to inspect my equipment in the past three years?
- Are my smoke detectors in proper working order?
- Are there new products available that could make my home or business safer?
- Who could I refer to receive three months of FREE monitoring?

Traveling this summer?

Home Security Tips

Exterior Lighting. Put outdoor lighting on timers, light-sensitive photocell mechanisms, or motion detectors. You want your home to have the "occupied look" in order to deter criminals.

Doors. All doors should be locked. This includes the doors leading from the garage to the house and the basement door. **Windows.** All windows should be secured to include second story windows.

Inform a Neighbor. Let a neighbor know of your absence. Ask them to keep an eye on your house, collect daily newspapers, collect the mail, and put garbage out on trash pickup days, etc.

Identity Theft. While away on vacation secure any important valuables, credit cards, etc. in a safe or safe deposit box. Make it hard for a criminal to find what he is looking for.

You have a security system....USE IT!!! While we encourage you to use your alarm system everyday we understand that many of you only use it when you go away. Before you pack that sunscreen give us a call and test your alarm system. Also make sure your emergency call list is up to date
